Company School watercolour of a Rufous Treepie

India, First half of the 19th century

Watercolour on European paper

31.2, 48.5cm

Rufous Treepie (*Dendrocitta vagabunda*)

This corvid has a large range, covering the Indian subcontinent and much of Indochina. They are adaptable, found in agricultural areas, forests, and gardens. They call attention with their loud calls. This bird appears in both the Impey and Wellesley albums.
